I am here only for achievements. Game was good at its first 1 and 2 installment, this one is the 7th. Cheap grab.. This DLC is, as its name states, a Free DLC. There is therefore absolutely no reason not to download it right away, as it adds interesting improvements to the base game.

To sum up its features :

- You can, with 6 friends (+ you = up to 7 people) face an AI in a skirmish. There is 3 difficulty levels (easy, medium and hard). Be aware that you can not face an AI with your friends without this DLC.
- 7 new multiplayer maps (Straight Ahead, The Last Base, Blitz, Summer Night, Storm Eye and 2 "attack V defend" asymmetrical maps)
- A new "flare" system. You can basically mark the battlefield and give orders that way, so your allies can see where they need to attack, hold their positions, capture a zone etc. As I said this DLC is a must-have in Wargame: European Escalation. Without this free content you could not play against the AI with your friends or use the flare system to mark the battlefield. Also, the new maps are cool.

What are you waiting for? Download it.. Fun concept, quirkily little storyline, but essentially zero replayability besides a handful of achievements. I was expecting something akin to Katamari in reverse, but it was more or less an enforced storyline - not so much a sandbox environment I was hoping for.. If you're decent at poker you will find this game pretty fun. I haven't gotten too far but so far I'm breezing through the first city. Too bad there's no Steamworks achievements :/ I've got tons of in-game trophies and awards for special scenarios that'd be cool to show em off on my profile/newsfeed ect, oh well. I wouldn't pay full price but at %75 off this is well worth it!. Really fun with friends! A couple glitches, but expected with a new release. Just always carry a normal doll!. **GOOD GAME IF YOU KNOW HOW TO USE DOS TO START IT**

Visibility is a very, very dark game. It is very hard (nearly impossible) to see the structure of the levels. So the game is really harder than i thought it would be. It is entertaining and really worth the money. You have to be patient and concentrated, to make it through the levels! I played already 30 minutes and only made it trough the first two proper levels. So it will take some time to finish the game. I already love this game and it's beautiful soundtrack!

But there are still some things i miss:

- Fullscreen
- A longer soundtrack

But i think this will come with patches in the near future. ^^ I highly recommend to play this game at night for relaxing gameplay ;)

Edit: Fullscreen got patched!. This is the kind of game you show your friends who have never tried virtual reality before. To show them how the Oculus Rift or HTC Vive can draw on your fear just as well as reality can. I told my friends that if they wanted to try my Rift for real, they would have to play through this game, lasting roughly 10 minutes, as a test of their dedication to try virtual reality xD

Needless to say, I sat and tried to hold in my laugh as they played through the game, knowing what was about to come. A few of them even refused to continue playing half-way through the game, so they failed their test. For 1€, this game is worth it all, especially because of the EXTREMELY scary atmosphere in the game!. One of the best poker games. Its just fun and simple. This game and its expansions are so nice to play. The challenges are fun and the graphics are amazing. I've played several zoo games and this one may not be the best but it's not the worst either. It adds elements of realism that many other zoo games don't such as caring for the plants as well as the animals. The guest, animals, and plants all react to the change in weather rushing for shelter or getting grumpy about it. I will also warn though for squeamish or younger players that in this realism they do show the animals jumping to conserve offspring and inbreeding are possible if not selling or separating the animals. Overall great game!. Slow Motion Issue!

my notebook is great but for some mysterious reason I can't play this game, even when I put literally every little thing in the minimum (windowed, etc.) it still doesn't work, how am I supposed to play something in slow motion????????? And I also can't get the refund, so... I was literally stolen, I am VERY very frustrated with this

nvidia geforce gtx 1050 ti VVV 16gb RAM VVV Intel Core i7-7700HQ CPU 2.80GHx 2.81 GHz

I can play the hardest games in a great resolution, but WWE 2K19 I can't play even with the lowest graphics configuration, I JUST WANT MY MONEY BACK
